### **AMERICA'S ELITE SPECIAL OPERATIONS FORCES TO BENEFIT FROM NEW TECHNOLOGY FOR ENHANCED TRAINING PROGRAMS**

*tiag® Introduces Warrior Performance Platform (WP2™)  
Performance and Readiness Technology for DoD and SpecOps Units*

RESTON, Va., Apr. 5, 2017 — Intrinsic in the intensive training of U.S. military's elite Special Operations Forces (SOF), it's all about enhancing strength and endurance to ensure readiness and survival. Now there's a technology to perfect the performance of our SpecOps units.

tiag® is honored to introduce Warrior Performance Platform (WP2™) — a wireless, wearable technology designed to help Department of Defense (DoD) military operations make smarter, safer decisions in SOF training. By monitoring key indicators of an individual's health, ability, performance and readiness, WP2 enables leadership to improve training programs that push these warriors to perform at their absolute best, while curtailing chronic/overuse and stress-related injuries.

"WP2 was created as a dynamic, customizable tool that allows military leadership to continually monitor, evaluate, adjust and optimize the training, performance and readiness of deploying warriors," says Dan McCarron, tiag's vice president of operations. "Empowering leadership and instructors to spend more time with warriors and less time in spreadsheets, the WP2 software tracks real-time and historical information within one centralized system."

Advancing proactive performance management from training through deployment, WP2 is powered by applied science and next generation human performance analytics. Bolstered by the military experience and technical expertise of tiag, the WP2 software integrates the CoachMePlus performance-optimization solution used by major teams across the NFL, NHL, MLB, NBA, NCAA, MLS, CFL and military.

Providing 24/7 encrypted information access to SOF performance and readiness data all in one place, WP2 works with more than 60 wearable device technologies, and includes an enterprise application as well as a team access point. Learn more about the WP2 technology on the tiag website or email [dmccarron@tiag.net](mailto:dmccarron@tiag.net).

#### **About tiag®**

Established in 1999 in Reston, Va., tiag (The Informatics Applications Group., Inc.) is an innovative management consulting and technology services firm esteemed for progressive technology solutions that transform business and advance critical missions. tiag takes pride in its people, achievements, processes and successes in leading program initiatives to support the security and health of those who serve military and civilian sectors of U.S. government. tiag's complementary services portfolio delivers focused expertise and support ranging from complex, enterprise-wide solutions to stand-alone custom projects.
