

**tiag® Chosen as Award Recipient of VA's \$22.3 Billion T4NG
IT Modernization Contract to Improve Delivery of Care and Services for Veterans**

RESTON, Va., March 10, 2016 – **tiag®** is honored to be chosen as a prime contract award recipient of [The Department of Veterans Affairs](#) (VA) Transformation Twenty-One Total Technology Next Generation acquisition program (T4NG). The T4NG contract primarily supports the Department's [MyVA](#) transformation — a set of initiatives maximizing breakthrough technology to augment and improve care and services for veterans.

A program ceiling of \$22.3 billion canopies the massive size and scope of this highly coveted T4NG contract, which covers a base ordering period of five years and one five-year option period. Designed as an Indefinite Delivery/Indefinite Quantity (IDIQ) Multiple Award Task Order contract, this multi-agency contract vehicle also allows other departments to purchase services from tiag and 20 other contract award recipients.

“For the past 17 years it has been our company's daily mission to improve the lives of service members, their families and other beneficiaries by providing a full range of innovative IT services and quality clinical informatics expertise across the Department of Defense,” says Dalita Harmon, tiag's president and chief executive officer. “This opportunity to contribute our expertise in delivering the best possible care and services for those who serve our country is a natural transition for us — and we are honored and excited to work with the VA, along with all the other T4NG contract awardees, in this significant mission.”

Over the next 10 years, tiag and 20 other T4NG award recipients will provide vital IT solutions including technical support, operations, program and network management, strategy planning, systems and software engineering, enterprise network engineering, cybersecurity, and other IT and health-related IT services.
