

## Accelerating Cloud-Migration Missions, TIAG® Serves as Select Consulting Partner in the Amazon Web Services (AWS) Public Sector Partner Program

RESTON, Va., June 11, 2019 — Helping federal, state and local governments swiftly consolidate their data centers and migrate to the cloud, [TIAG®](#) — an innovative technology company providing strategic, transformational solutions to private industry and across the Department of Defense — now serves as a [Select Consulting Partner](#) in the Amazon Web Services (AWS) [Public Sector Partner Program](#).

Select Tier Consulting Partners within the global [AWS Partner Network](#) (APN) are professional services firms that help customers of all sizes design, architect, build, migrate and manage their workloads and applications on AWS. These consulting partners include system integrators, strategic consultancies, agencies, managed service providers and value-added resellers.

The AWS Public Sector Partner program comprises companies who demonstrate exceptional capability, experience and readiness to support government, education, and/or non-profit customer missions. Program partners are chosen to provide services for one or more of the following categories: Government, Primary & K-12 Education, Secondary and Higher Education, and/or Nonprofit. AWS approved TIAG as a Select Consulting Partner supporting all four program designations, based on TIAG's exemplary history of delivering innovative solutions and superior transformational business results for government, education and nonprofit organizations.

As government customers increasingly embrace cloud migration and data-center consolidation, AWS has tailored its cloud offerings specifically to meet the needs of government by launching [AWS GovCloud](#). Allowing for scalable, affordable and secure delivery of IT resources and applications, AWS GovCloud eliminates the need for large upfront investments. As an on-demand service, AWS GovCloud provides government customers with increased services as needed — empowering surge without hardware investment — and allows them to and scale back down when appropriate.

TIAG Chief Strategy Officer [Umang Modi](#) says that, based on TIAG's expertise in [cloud integration and data center consolidation](#) bolstered by [cybersecurity and information assurance](#), TIAG is offering AWS GovCloud as the ultimate solution in cloud-migration missions to streamline IT infrastructures and functions across government. In addition to increasing an organization's level of security assurance and reducing operational risk, notable benefits include high-level automation, enhanced security, improved reliability, increased manageability, less maintenance and substantial cost savings.

“We are excited to maximize our new status as an Amazon Web Services Select Consulting Partner to benefit our customers in their missions to migrate systems to the cloud, while enabling data center consolidation,” says Modi.
