NEWS RELEASE

U.S. Navy Chooses tiag® to Establish World-Class IT Network for Office of Naval Research

RESTON, Va., August 22, 2018 – Advancing the mission of the Navy's Office of Naval Research (ONR) to coordinate, execute and promote the science and technology programs of the United States Navy and Marine Corps, **tiag®** — an innovative technology services firm and systems integrator — was chosen as prime contractor for a significant, five-year, multi-million dollar contract.

tiag's work on this program covers a full spectrum of IT solutions and services. Delivering stable, efficient IT operations to establish a world-class network operation, tiag will also support ONR business processes.

Moving full speed ahead, tiag added two dozen new team members for this project to manage and improve efficiency and effectiveness of the infrastructure. In addition to engineering and deploying solutions to the network, servers and applications, tiag will incorporate enterprise architecture best practices to enhance operational performance. Maintaining network hardware, software and middleware, tiag will seamlessly transition new services to the ONR IT enterprise. Achieving and sustaining a robust Information Assurance (IA) and Mission Assurance (MA) posture across the ONR IT Enterprise, tiag will leverage Information Technology Infrastructure Library (ITIL) and ISO 20000 best practices in providing IT service desk support.

"We are honored to support the Navy and ONR, and as we foster transition from science and technology to higher levels of research, development, test and evaluation, tiag's work on this contract further solidifies our company's stalwart support of DoD's research community," says tiag Managing Principal and Chief Strategy Officer Umang Modi.

ONR is an executive branch agency within the Department of Defense that supports the President's budget and provides technical advice to the Chief of Naval Operations and the Secretary of the Navy. Notably, ONR's mission is of paramount importance to the maintenance of future naval power, preservation of national security, and management of the Navy's basic, applied and advanced research.
